

Safety from the Inside Out (#)

Safety from the Inside Out

For many people, the idea of safety in an educational context brings to mind the problem of school violence, and specifically the crisis of children at risk around the country in recent years. Let's begin, then, by noting that the language of this issue has already served important functions: ... while more than eight thousand children were killed elsewhere, this important issue has been both a ... while more than eight thousand children were killed elsewhere, this important issue has been both a ... while more than eight thousand children were killed elsewhere, this important issue has been both a ...

First, we Americans have to imagine that individual lives will take on the characteristics of a ...
